

## 125 GREENWICH STREET

New York, New York, USA

RAFAEL VIÑOLY ARCHITECTS

April 2016

At 125 Greenwich Street, on the corner of Greenwich and Thames streets in Lower Manhattan, Rafael Viñoly Architects resisted the architectural trend to build pencil-thin and sky-high, maximizing zoning height allowances. In an unconventional approach to current residential tower design in New York City, the 125 Greenwich Street design opts for a shorter building with a larger floor plate, a context-sensitive solution that also creates more generous apartment layouts. With a rounded corner and a glass façade on the perimeter of the site, the parallelogram-shaped tower creates a landmark residential project just two blocks south of the World Trade Center site, in the heart of a growing cultural, business, and residential district.

Rafael Viñoly Architects requested a zoning variance that would allow for a building perimeter with larger floor plates in exchange for a reduced building height from the previously approved scheme—70 stories down from the permitted 85. The lower height provides a respectful adjacency to the buildings on the new World Trade Center complex that are newly built and under construction.

### FACTS + FIGURES

**Completion**  
2018

**Size**  
42,740 gsm

**Client**  
VS 125 LLC

**Consultants**  
*Structural Engineer*  
DeSimone

*MEP / FP Engineer*  
Consentini Associates

*Accessibility Consultant*  
United Spinal Associates

*Architectural Concrete Consultant*  
Reginald Hough Associates

*Concept Interior Designer*  
March and White

*Life Safety and Code Consultant*  
Jensen Hughes

*Specifications Writer*  
Robert Schwartz & Associates

**New York**  
50 Vandam Street  
New York, NY 10013
